

Gentelmen:I do not believe what I'm hearing. You are honestly telling me I cannot in the future recieve a signal from a radio or television station over a card inserted into my computer. You are honestly telling me I cannot use a "TIVO" to record a television broadcast that I may view at a later time at my convienence. So if I am not at home when a song or show is broadcast over the air I am to be deniged the privledge of listening to said song or that show. Were you borne in the USSR? Do you honestly believe any American citizen will put up with this? Are you trying to cause and overthrougth of the United States Government? If the United States Government tries to make such a law I think we all need to study our history lessons. When King George tryed to tell the colonials they had to house the King's armys for the good of the King, The Bostonians held a tea party in his honor, That is exactly the same kind of overt excess that telling me what radio and tv programs I can listen to and!

how is dooing. I prommise you I will not stand for this kind of high handed dictatorship over my life.

Tom Walker

former member of the Republican Party.
